

The Application Management Experts

BI Readiness Assessment

Business Intelligence Readiness Assessment

TriCore Solutions provides a comprehensive review of your existing environment in preparation for implementing or upgrading your Business Intelligence deployment

Start your Business Intelligence Program Today!

Through this assessment TriCore reviews your existing business processes, systems and tools and gathers critical requirements necessary for laying out a proper roadmap that aligns with your organizations overall Business Intelligence and Data Management strategy.

Other Tasks and Activities

Through discovery, planning and development TriCore can assist with

- Enterprise Application Integration: Data source compatibility assessments, ETL design and data modeling best practices.
- Corporate Performance Management: Enterprise reporting, scorecards/dashboards, monitoring and business analytics.
- Application Infrastructure: Design and layout best practices for data warehousing, subsystem RAID configuration, indexing and partitioning.
- Strategic Services: Master Data Management, BI Program Development, Technology and Platform Alignment.

Access your organizations enterprise environment, terms, data quality and ability to go to the next level with BI
