

The Application Management Experts

SharePoint Upgrade

TriCore has assembled a team of professionals with many years of experience in the planning, designing, implementing and supporting of SharePoint and Project Server applications. TriCore is an end-to-end Microsoft solutions provider dedicated to the advancement of Microsoft technologies in your environment. With our years of experience we can assist you with an assessment of your SharePoint environment and recommended road map to get you where you need to be.

Unlike previous versions of SharePoint that would allow an 'in-place' upgrade, SharePoint 2013 does not provide that option. TriCore can provide a solid and affordable upgrade and migration path to SharePoint 2013 by providing:

Resources: Skilled and experienced resources that understand the complexities and challenges of a successful SharePoint migration and implementation

Assessment: TriCore will perform an analysis of your existing environment to properly plan and execute the migration strategy

Methodology: TriCore will conduct business requirements and discovery sessions to identify what works, what isn't working, and help you create a tailored SharePoint road map

Questions for Consideration?

- Are you considering the implementation of SharePoint?
- Have you recently implemented this technology?
- Are you considering integrating SharePoint with Line of Business (LOB) systems?
- Is your SharePoint search implementation yielding the expected results?
- Are your teams able to access SharePoint documents, lists, and sites that enhance enterprise collaboration and breakdown the silos so often found in organizations?
- Is your SharePoint site navigation intuitive for users?
- Are your SharePoint databases growing faster than you expected?
- Is your average response time to users falling within an acceptable range?
- If you answered yes to any of these questions, an assessment may be of value to you?

Why TriCore Solutions?

- Over 16 years of industry and upgrade experience
- An award winning Microsoft partnership
- A rapid on-site/offshore deployment model
- Effective project tracking and monitoring systems
- Dedicated PMO resources
- Microsoft Certified consultants

About TriCore Solutions

TriCore Solutions helps organizations of all sizes manage their IT infrastructure and optimize their central applications in order to operate more effectively.

TriCore's partner relationship with Microsoft gives our customers a level of access to knowledge and personnel that is normally reserved for internal employees only. We understand that the customer is not successful because of the software selection so much as the implementation strategy, project execution, training, and ongoing support.

Leading companies from all industries have trusted TriCore to provide the infrastructure, implementation, customization and the outsource management of their technology solutions.

TriCore Trusted Promise

We are technology experts with a culture deeply rooted in customer service. It is not just what we do, it is who we are. The TriCore Trusted Promise sets us apart from our competition and is why close to 100% of our customers stay with us and continue to expand the partnership. It is our commitment to our customers to deliver unparalleled service with superior technology and people.

We are continuously monitoring your applications and services. Our global support team is empowered to serve and support your business 24x7x365. We believe in complete transparency at all levels of our company without surprises or hidden costs.
