

The Application Management Experts

## SharePoint Assessment

TriCore has assembled a team of professionals with many years of experience in the planning, designing, implementing and supporting of SharePoint and Project Server applications. TriCore is an end-to-end Microsoft solutions provider dedicated to the advancement of Microsoft technologies in your environment. With our years of experience we can assist you with an assessment of your SharePoint environment and recommended road map to get you where you need to be.

The TriCore SharePoint Assessment will evaluate the current state of the organization's SharePoint implementation and recommend key areas requiring optimization such as SharePoint Architecture and Infrastructure, Information Management and Governance, SharePoint Search, Database Optimization, Security and Permissions, Business Intelligence, Site Navigation, and Overall System Health.

The current state is analyzed and documented to recommend initiatives, approaches, and priorities.

### Questions for Consideration?

- Are you considering the implementation of SharePoint?
- Have you recently implemented this technology?
- Are you considering integrating SharePoint with Line of Business (LOB) systems?
- Is your SharePoint search implementation yielding the expected results?
- Are your teams able to access SharePoint documents, lists, and sites that enhance enterprise collaboration and breakdown the silos so often found in organizations?
- Is your SharePoint site navigation intuitive for users?
- Are your SharePoint databases growing faster than you expected?
- Is your average response time to users falling within an acceptable range?
- If you answered yes to any of these questions, an assessment may be of value to you?

### Major Deliverables

TriCore's SharePoint Assessment report will include:

- Overview of the current state and a prioritized list of recommended initiatives
- Overview of required changes, priorities, implications and constraints incorporating the recommended initiatives, approaches and priorities
- Management presentation that summarizes the SharePoint Assessment findings

### Why TriCore Solutions?

- Over 16 years of industry and upgrade experience
- An award winning Microsoft partnership
- A rapid on-site/offshore deployment model
- Effective project tracking and monitoring systems
- Dedicated PMO resources
- Microsoft Certified consultants

**TriCore wants to be your  
“Go To” partner for all your  
SharePoint need!**

## Scope of the Offering

TriCore will focus and evaluate the following areas for your business:

- SharePoint Architecture and Infrastructure – ensure that the SharePoint farm is operating efficiently from a hardware, network, and application perspective.
- Information Management and Governance – review policies and procedures for the management and governance of official information as well as retention policies.
- SharePoint Search – review search configuration and error reports to confirm search functionality is being executed effectively.
- Database Optimization – analyze SQL database servers and database configurations for optimization improvement opportunities.
- Security and Permissions – review security and permission settings within the SharePoint farm to include security standards and procedures.
- Business Intelligence – assess the current state of BI configuration (if applicable) as well as future SharePoint BI availability.
- Site Navigation – evaluate overall site navigation from a customer perspective (ease of use).
- Overall System Health – analyze farm health and recommend remediation based upon assessment.

## About TriCore Solutions

TriCore Solutions helps organizations of all sizes manage their IT infrastructure and optimize their central applications in order to operate more effectively.

TriCore’s partner relationship with Microsoft gives our customers a level of access to knowledge and personnel that is normally reserved for internal employees only. We understand that the customer is not successful because of the software selection so much as the implementation strategy, project execution, training, and ongoing support.

Leading companies from all industries have trusted TriCore to provide the infrastructure, implementation, customization and the outsource management of their technology solutions.

## TriCore Trusted Promise

We are technology experts with a culture deeply rooted in customer service. It is not just what we do, it is who we are. The TriCore Trusted Promise sets us apart from our competition and is why close to 100% of our customers stay with us and continue to expand the partnership. It is our commitment to our customers to deliver unparalleled service with superior technology and people.

We are continuously monitoring your applications and services. Our global support team is empowered to serve and support your business 24x7x365. We believe in complete transparency at all levels of our company without surprises or hidden costs.
